DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 7-16, 18, and 19, drawn to a light-emitting device.
 - II. Claims 20-22, drawn to the structure of invention I in combination with additional lead frames, with particularly claimed physical orientation with respect to each other, and additional light-emitting devices, with at least two distinctly colored light-emitting devices.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination has the particular physical feature of the lead frame, which is an area of its end surface is smaller than the area of its base portion. The subcombination has separate utility such as a single colored light-emitting device with, for example, a single lead frame, or in a light emitter with two joined lead frames extending horizontally parallel to each other.
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
